

A NEW LEVEL OF COMFORT

NEW TREND:

The fact that the consumer is king – or queen – is a known fact in all of retail today. Living in a 21st century consumer society, when it comes of shopping, customers have a lot of options to choose. Within the underwear sector alone, there are thousands of brands to choose from to suit all tastes, all with distinctive and alluring differences.

To sustain in this competitive market each and everyone has to take some new initiative to keep pace with the fast growing trend.

We've followed the upcoming trends and decided to add some new category of products in our product category basket.

BONDING TECHNOLOGIES

THE MOST INNOVATIVE WAY TO CONNECT FABRICS WITHOUT SEWING

BONDING:

Mondol Intimates has started BONDING technology from January 2020 as it's the most prominent and popular trend to the teen agers and the adult ladies as well. Not only in western countries it also now popular in eastern countries so far. Though it's a different kind of technology we've started with some basic panties and determined to expand to all kind of Boxer, Bra and other product categories.

INOBAND

*RESHAPING CONVENTIONAL SHAPES, FOR ULTIMATE COMFORT
AND SUPPORT*

A close-up photograph of a woman's upper torso, showing her wearing a light beige, seamless, bonded bra. The bra has a V-neckline and thin straps. The background is a plain, light-colored wall.

SUPPORT HAS NEVER FELT SO COMFORTABLE

BONDED BRA:

Comparing with the regular Bra we're manufacturing Bonded Bra is quite technical and technological as well. Determination is a key to success so we're going to start this project with strong determination so that we can go ahead with upcoming trends and technologies.

To achieve the goal of success we've purchased the best quality of Bonding machineries and going to hire some technical persons distinctively.

ACTIVE WEAR

*THE PERFECT COMBINATION OF DESIGN AND SUPPORT TAILORED
TO ANY SPORTING ACTIVITY*

ACTIVEWEAR:

Nowadays people are more health conscious. Though the people are very busy most of them around the world do some workout at least once in a day. To do so there are some products very popular everywhere known as activewear.

We're also focusing on these kind of products as a part of our future product basket.

SHAPING CONFIDENCE

LASER CUT & SHAPEWEAR:

To do Bonded products and activewear Laser cut technology is very essential nowadays. So many varieties of product designs are now available in market. Different kind of customers are also demanding similar kind of products. So we already have set up Laser cut machine which is started along with bonding.

Besides requirement of Shapewear is growing rapidly. So we're intended to introduce this product in our future planning which will be in our product line in 1st quarter of 2021.

3D TECHNOLOGY:

The whole world is running after fast changing fashion. Most of the customers eagerly wait for the new collection. In this regard to reduce the shorter development period people are now taking technological support. 3D design is one of them. There are several software companies who're providing this 3D technology. After comparing between some renowned 3D software we've setup CLO 3D software and our team is now working on it. With the support of this software we're now doing 3D samples of Bra, panty and swimwear.

THANK YOU
